## EDUCATION

**Software Engineering (2021)**  
University of Petra – Amman, Jordan

**Udemy (2021)**  
Data Structure & Algorithms | Adobe Photoshop & Illustrator | Flutter & Dart | Web Design

**Astrolabes (2022)**  
Web Development Bootcamp

## PROFILE

Accredited with a Bachelor’s degree in Software Engineering. Proficient in utilizing advanced technologies and software such as HTML, Bootstrap, CSS, JavaScript, and React.JS to perform key technical tasks under compressed deadlines across fastpaced environments. Stellar record of leading implementation of back-end of website along with testing and identifying website-specific functional and non-functional requirements. Enthusiastic web developer with commendable background in organizing/gathering all necessary tools and expertise to design application in line with pre-defined goals. Well-versed in providing professional mentorship to software learners. Articulate communicator with ability to foster and nurture positive and long-term relationships with team members and software developers to achieve all pre-defined goals.

## WORK EXPERIENCE

**Trend Cast Front-end web developer | New Gen**  
Contract Jan/2023 - Jun/2023

- Project Overview:**  
Helped building the Front-end of a Trading website, implemented all the pages and routed them with each other correctly to help the client navigate between them smoothly using React.js Framework and DOM. Provided some solutions to enhance the website’s experience. Finished it in the specified deadline and did some maintenance for the website.
- Organized code files to help the Back-end team work on the project.
  - Designed the website using SCSS technologies.
  - Implemented the front-end to work on different devices.

**Capture Beauty Full-Stack web development | Astrolabs**  
Internship Feb/2022 – May/2022

- Project Overview:**  
Established a community in digital form by using proven professional expertise, whilst serving as web developer. Successfully created both back-end and front-end with inclusion of several pages with swift and user-friendly functionality. Regarded difficulties as an opportunity to grow and learn something new. Troubleshoot any bugs on website and uploaded code work to GitHub. Optimized website in preparation for future updates.
- Developed website interface and internal dynamics using different software and tools.
  - Led flawless and uninterrupted development of on-demand websites.
  - Up-held responsibility for sustainable and scalable code development.
  - Designed sequence of events to govern all functions of website.
  - Managed, improved, and maintained UI and UX for websites.
  - Uploaded Front-end as well as Back-end to Heroku.

**PocketDoc Full-stack Mobile application | Petra University**  
Graduation Project Jan/2021 – Jul/2021

- Project Overview:**  
Led end-to-end development of application to facilitate communications between patient and doctor and reduce need for patients to physically visit doctor's clinic. Researched, tested, and recognized requirements for application. Designed application interface and internal dynamics. Projected scenarios regarding appropriate and continual functioning of application. Designed flow charts for sequence events and visual identity as well as branding of application. Hands-on experience developing various applications, including PocketDoc.
- Introduced chat screen between patient and doctor to enable uninterrupted communications.
  - Ensured timely and seamless implementation of application for patient's side.
  - Reviewed both functional and non-functional needs of application.
